## BETTER CUSTOMER SATISFACTION

### MORE PROFITABLE NURSERY BUSINESS

Plantect makes early and late season plantings more successful.

Plantect enables large trees and shrubs to stand transplanting shock better.

Plantect makes better sales by keeping stock on display more attractive and healthy.

Plantect saves seedlings, rooted cuttings and grafts in transplanting.

Plantect protects against dry out and browning in winter.

Sprayed with  
Plantect

Transplanted same  
time but not sprayed

So easy to use: simply pour into sprayer, add water and spray.

Observe these few simple rules: Keep from freezing, avoid hard well water in mixing, wash sprayer carefully after use. One part Plantect to 4 parts water is usually best. Weaker mixtures may also be used.

PROTECTS PLANTS

Containing Goodite VL-600 produced by  
B. F. Goodrich Chemical Co.

## STOPS WINTER BURN

**Retards evaporation from leaves while transplants are establishing new roots. Minimizes wilting and resulting setback to plant growth.**

- Permits transplanting any time of year
- Can be used as a spray or a dip
- Will not harm plant tissues
- Long-lasting, forms transparent film
- Reduces water loss through foliage
- Has no toxic effect
- Simple and convenient to use
- Actually enhances appearance
- Almost invisible
- Retards winter burn

PLANTECT can be applied any time when atmospheric conditions will allow it to dry fairly rapidly. When PLANTECT is dry, it is transparent. Temperatures of 70° or higher are ideal but satisfactory results can be obtained at much lower temperatures. When PLANTECT is used indoors, drying can be hastened by artificial heat and the use of fans.

**HOW TO APPLY — PLANTECT** can be sprayed or dipped, whichever is most convenient. Use any type of pressure sprayer. Care should be taken to get complete coverage.

For transplanting evergreens — Use one part PLANTECT to 4 parts water.

For transplanting deciduous shrubs and trees — One part PLANTECT to 6 parts water.

For rooted cuttings from greenhouse and beds — One part PLANTECT to 8 parts water.

For deciduous stock for storage — One part PLANTECT to 1 or 2 quarts water.

**CAUTION:** Clean sprayers carefully with water after using PLANTECT. Spray equipment, especially hose, pipes and nozzles, are likely to clog if not flushed out with water at least once daily. PLANTECT should never be left in sprayer over night.

## HANDY-MAN GRIPZIT CAN PLIERS

If you are not yet enjoying the Smooth pickup, the Easy hand-hold, the Safe carrying, the Instant release—of the HANDY-MAN Gripzit you are missing a good tool. Made of steel with bronze rod handle-linkage. Great strength. Light and small enough to carry in your pocket. (Finish-plated)

WHY continue lifting heavy plants-in-cans with extended finger tips. Straining every muscle in hand and arm? The GRIPZIT lets you carry weight where NATURE meant it to be carried — with all four fingers turned up — In their strongest position. With thumb for brace.

The GRIPZIT speeds truck or yard dolly loading. SAVES hours in relocating Blocks of can or container grown plants. SAVES plant injuries due to DROPPING such plants. SAVES hand injuries. SAVES the cans, too. (You've seen workers kick down the top of large cans to make a sort of hand-hold) SAVES YOU MONEY. MAKES YOUR EMPLOYEES HAPPY.
